Deputy Director,
Research and Reports
Central Intelligence Agency
Washington, D.C.

Dear Bill:

Let me extend the thanks of NASA top management and myself to you and your colleagues for having done a first rate job on the difficult subject of the use of Soviet space technology in the civil economy. I can assure you that this report, like others your office has prepared for us, is being given a very careful reading and will contribute richly to our understanding of the Soviet counterpart.

I do plan to pursue the subject of biomedical spin-off from the space program and will deal with [REDACTED] of OSI on this subject.

My best regards.

Sincerely yours,
